---

Eighteen years of building for the web, from agency work to product teams. I care about **how easy an interface is to use** as much as about everything that only shows when it breaks: **back end, security, test suites, release pipelines, accessibility**. Currently consolidating this experience with a Licence professionnelle in computer science at CNAM Paris (third and final year), alongside full-time work.

## EXPERIENCE

---

2023 – now

**Ninox** · Senior software engineer, Berlin

Low-code database platform with web, desktop, iOS and Android apps and a scripting language of its own.

- Security of the web and mobile apps: CORS and CSP policies, sensitive data in caches, disclosed keys, user enumeration, path traversal, dependency hygiene. Fixed XSS and CSRF issues and closed an arbitrary code execution path in the scripting engine.
- Audited and hardened the password reset flow of the account service: found the weaknesses, wrote and shipped the fixes.
- Took over the end-to-end test suite and made it trustworthy: fixed the root causes of flaky tests, ran it in parallel against a nightly environment, extended it to the native mobile apps on my own initiative.
- Product work across interface, core features, scripting functions and native apps; modernised a legacy code base.
- Tooling for the main repository: developer experience, dead code analysis, Dependabot with test pipelines for the Gradle and npm projects.

TypeScript, Node.js, Playwright, Allure, GitHub Actions.

2022 – 2023

**Novadiscovery** · Front-end developer

Clinical trial simulation platform (Jinko). Knowledge management tools for scientists: collecting and annotating literature together, a real-time collaborative editor, trial monitoring screens, multi-user trial set-up wizards.

TypeScript, Vue.js, GraphQL.

2021 – 2022

**OpenClassrooms** · Mentor

Weekly sessions with students on the web developer track: HTML, CSS, Sass, JavaScript, React, SEO, accessibility. Project reviews and unblocking.

2021

**Actronika** · Code audit

Review of an Electron node-based editor for haptic feedback design: quality and maintainability assessment on request.

Electron, React, Redux, TypeScript, WebSockets.

---

2017 – 2021

**Arte France Développement** · Full-stack developer, Vanves

- Lead developer for over a year on Educarte, Arte's video platform for schools: single sign-on connectors (CAS, SAML), Elasticsearch search, front-end integration.
- New website for Arte's digital productions: headless CMS, Next.js front end over GraphQL, faceted search.
- Front ends for the Institut Français cinema platform (React, Redux-Saga) and the Arte online store; Java and Spring Boot sites for the European Film Factory and e-classe.be.

Java, Spring Boot, Elasticsearch, TypeScript, React, Next.js, PHP.

2012 – 2015

**AREA 17** · Back-end developer, Paris

Architecture, and sometimes the front end, of high-traffic sites for clients such as Facebook and Canal+: i>TELE, Canal Street, Maison & Objet, Paris Photo, StumbleUpon.

PHP (Kohana, Laravel), Solr, MySQL, PostgreSQL, WordPress.

2008 – 2011

**Upian, Calliweb** · Web developer, Paris

Interactive experiences for brands and institutions at a digital studio; then e-commerce front ends tuned for display speed and consistency across devices.

PHP, Zend, Magento, WordPress, Sass, JavaScript.

**OPEN SOURCE AND SIDE PROJECTS**

**cargo-local-registry**

Maintainer since 2021 of this Cargo subcommand for offline Rust builds. Kept it working through Cargo's internal API changes, added an add command, moved CI and releases to GitHub Actions. Over 300,000 downloads.

**Synapse**

Local-first study app, 2026. Svelte 5, NestJS, Tauri, Rust, Loro CRDTs. OIDC and SAML accounts, server-side OCR and document conversion, AI-generated exercises with the provider of your choice.

More side projects, shaders, games and experiments at denishovart.com/projects.

**EDUCATION**

In progress

Licence professionnelle in computer science, CNAM Paris. Third and final year, pursued alongside full-time work.

**SKILLS**

Languages

TypeScript and JavaScript, Java, Rust, PHP.

Front end

React, Vue.js, Svelte, Next.js, accessibility, CSS, design systems.

Back end

Node.js, NestJS, Spring Boot, Laravel, GraphQL, Elasticsearch and Solr, PostgreSQL.

Quality

Playwright end-to-end suites, visual regression, CI on GitHub Actions and CircleCI, security remediation.

Design

Interface and interaction design, prototyping, user testing.

Languages spoken

French (native), Brazilian Portuguese (near native), English (fluent), German (B1).
